**Skin contact:** Flush skin with water for 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Inhalation:** Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

**Ingestion:** Call medical doctor or poison control center immediately. Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

#### **4.2 Most important symptoms and effects, both acute and delayed**

Product is a corrosive material; causes burns by all exposure routes. Ingestion causes severe swelling, severe damage to delicate tissue and danger of perforation. Use of gastric lavage or emesis contraindicated due to the product being corrosive. Possible perforation of stomach or esophagus should be investigated.

#### **4.3 Indication of any immediate medical attention and special treatment needed.**

No information Available.

### **SECTION 5. FIRE FIGHTING MEASURES**

**Flammability of the product** : Non-Flammable  
: Use suitable media for surrounding materials. If water use fog spray, avoid direct stream.

**Special exposure hazards** : Avoid contact with metal, hydrogen chloride gas can react with aluminum, tin, lead, zinc

**Decomposition products** : Decomposition products: hydrogen gas, hydrogen chloride gas

**Special protective equipment for fire-fighters** : Use self-contained breathing apparatus with water spray.

**Explosion hazards** : Hydrogen gas can form in fire situation which is flammable.

### **SECTION 6. ACCIDENTAL RELEASE MEASURES**

#### **6.1 Personal precautions, protective equipment and emergency procedures**

Keep unnecessary and unprotected personnel from entering area. Avoid breathing vapors. Provide adequate ventilation. Do not touch or walk through spilled material. Beware of vapors accumulating to form explosive hydrogen gas mixtures. Full personal safety equipment (suit gloves, respirator, face shield) required.

#### **6.2 Environmental precautions**

Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers. Contain spill area.

#### **6.3 Methods and material for containment and cleaning up**

Corrosive liquid! Ventilate area. Prevent runoff. Contain and collect spillage with absorbent material e.g. sand, earth, vermiculite etc and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Dilute with water and mop-up or absorb with an inert dry material and place in an appropriate waste disposal container. Avoid contact with strong oxidizers.
